

Gregory Kalabin

Software Engineering Leader with
15+ years of experience

☎ +44-7949-273-728
✉ gregory@kalabin.net

- Since April 2025** Google, Software Engineering Manager.
- Manager of Software Engineering team in Site Reliability of Google Compute Engine.
 - Owning the team charter, roadmap and execution. Close partnership with the stakeholders to align on the progress and proactively address risks.
 - Performance management of Software Engineers. Ran multiple successful promotion cases for my team.
 - Execution owner of critical cross organisation projects. As a result, supported organic growth of 50+ services owned by dozens of teams.
 - Hands on Software Development on the team.
 - Member of oncall rotation defending whole of the GCE API reliability.
 - Coached and mentored Software Engineers in my team and beyond.
- October 2020 to April 2025** Google, Senior Software Engineer in Site Reliability.
- Software Engineer in Site Reliability of Google Compute Engine.
 - Tech Lead of an SRE team, owned the roadmap and execution in the team in partnership with the manager of the team.
 - Landed projects spanning a number of developer organisations: designed new services in the GCE Control Plane and worked across the organisation to enable migration of all of the GCE API traffic to them. Resolved conflicts and aligned on common solutions.
 - Developed capacity management tool used across all of Google to safely adjust deployment size. Multiple confirmed cases of prevented outages across the company.
 - Incident Commander of multiple major outages: mitigated impact, involved and coordinated with Google infrastructure teams during the incident, wrote postmortem and made sure the followups were fixed.
 - Coached and mentored other Software Engineers.
- April 2018 to July 2020** Booking.com, Software Engineering Manager.
- Held a combined role of Software Engineering Manager and Senior Software Developer in which I directly managed a team of Software Engineers alongside delivering hands on work on the team.
- As a people manager:
- Managed a team of software engineers.
 - Provided mentoring and coaching for the team members to help succeed in their career.
 - Did performance management: prepared and participated in the calibration sessions and delivered perf results.
 - Hired talent for the team
- As a tech lead and a senior software engineer:
- Designed and owned the execution of the team roadmap. Collected requirements from the stakeholders. Supported team members in the execution of the roadmap and resolving blockers they had.
 - Expanding existing experimentation platform to support microservices. We launched the first A/B test in Java and JavaScript and onboarded the biggest Java service (HotelPage API) on A/B testing platform.
 - Building highly scalable system which handled 400k+ requests per second.
 - Designing, writing and maintaining client libraries for Java, JavaScript and Perl.
 - Partnered with Product Managers to align the product and technical roadmaps.

March 2017 to April 2018	Booking.com, Full Stack Software Developer. Full Stack Software Developer on Partner Experiments Team responsible for A/B testing platform for Booking.com partners (e.g. hotels or property managers): • Extending the existing A/B testing platform to Booking.com partners. • Collaboration with data scientists on building trustworthy metrics for analysing changes in partner behaviour. • Enabling customer support metrics for A/B tests for all of the product teams. • Maintaining data pipelines generating metrics and minimising the data loss. • Partnering with product management and data science teams to develop the A/B testing platform.
July 2015 to March 2017	Lazada, Senior Software Developer. Senior Software Developer developing microservices in Golang. • Developing frontend server in Golang serving pages within 50ms and handling 100+ QPS. • Profiling and debugging performance bottlenecks in golang applications. • Designing and implementing config distribution library.
November 2012 to July 2015	Papeeria.com, Full Stack Developer. Full Stack Developer in a 3-people startup for changing the way people write scientific papers.
June 2011 to November 2012	Lanit-Tercom, Junior Software Engineer. Android developer, contributor to two major android apps the company was developing for external clients.

Technologies

Skills	Technical Leadership, Distributed Systems, Kubernetes, Software Development
Languages	Java, Go, Python, Typescript/Javascript, Perl

Education

2008 – 2013	Specialist (Master's equivalent) Saint-Petersburg State University, Applied Mathematics
--------------------	---
